

Producing Australia's largest range of beef products

"the joy of eating"

Our Group

NH Foods Australia Pty Ltd is a wholly owned subsidiary of the NH Group, a publicly listed company and Japan's leading company in the fresh meat, ham and sausage industry.

Our Group operates 3 large beef export processing facilities, which are strategically placed in prime cattle areas in New South Wales and Queensland and which are

acknowledged as industry leaders in food safety and hygiene. These facilities are supported by one of Australia's largest and most modern cattle feedlots.

World wide sales are made through NH Foods North Sydney office and, where necessary, access the international group's sales network.

NH Foods is also a major supplier to the Australian domestic market through its subsidiary, Beef Producers Australia Pty Ltd.

Our Cattle

Australia enjoys an outstanding international reputation for the quality and health of its cattle raised in a "clean green" environment. Australia is one of the few countries both BSE and Foot & Mouth Disease free, with stringent chemical residue restrictions.

Our Group sources a wide range of cattle from the best cattle producers throughout eastern Australia to meet the precise requirements of each product specification, including Angus, Murray Grey, Hereford and other British breeds for premium grainfed

products. EU certified cattle for high quality chilled beef for EU markets and Cattle from certified organic beef producers for high quality organic beef markets.
